

DORA-compliant. Low Risk. Secure.

DAS
**CYBERRISK
RATING**
by KSV1870

The DORA Module by KSV1870 provides comprehensive documentation of global IT supply chains. It plays a **crucial role** in meeting the requirements of the „Register of Information“ by helping to collect the data that must be obtained externally from suppliers and sub-suppliers.

WHAT CAN THE **DORA** MODUL DO?

- Global documentation and inventory of supplychains
- Identification and analysis of potential risk concentrations within the supply chain
- Efficient and secure integration with existing systems via API interfaces
- Meets all regulatory requirements through standardized data preparation
- Intuitive visualization of supply chain structures allows complex supplier relationships to be easily understood and analyzed at a glance

Curious about what's next?

- Premium Services
- Insolvency and Credit Monitoring
- Increasing security and transparency in supply chains

BENEFIT FOR YOUR COMPANY!

- Faster Access to Reliable Data**
With standardized processes, you can efficiently collect supply chain data without extra effort
- Clear Processes for Your Suppliers**
Recurring procedures create reliability, save time, and minimize follow-up questions
- Efficiency That Pays Off**
Your suppliers benefit from optimized workflows and you gain better data quality and more predictable collaboration
- Transparency That Protects**
Gain full insight into your supply chains and strengthen your company's digital resilience in the long term
